

# Icebutler 1

More than just a thin client

The Icebutler is the first recycled fully featured intelligent network client with user-friendly graphical interface for a small price. Based on a Compaq small form factor computer the Icebutler gives you extraordinary power to access heterogeneous server configurations and Windows terminal servers.

The Icebutler with Elux software provides access to the Microsoft Windows Terminal Server using either RDP (Remote Desktop Protocol) or the Citrix Metaframe Server with the protocol ICA (Independent Computer Architecture). Furthermore, the Icebutler provides access to any web server by connecting to the Internet with the Netscape Communicator, Opera or Mozilla web browser. The Icebutler with Elux enables access to any UNIX system and thus serves as a fully functional X11 or VNC workstation. With the Terminal Emulation Suite all mainframe systems may be used as servers. Last, but not least, connection is provided to the SAP server with the integrated "SAP@GUI for the Java environment on eLux".

The Icebutler with Elux software is a complete desktop solution which offers a fast, comfortable and secure access to Windows and other applications residing on servers. Neither the end-user nor the administrator need Linux knowledge. The user interface is simple and easy to use.

Combined with the management tool Scout eL (eLux Manager) a great number of Icebutlers can be managed most comfortably from a centralized location, again without requiring any Linux know-how.

Another eLux highlight is the image builder, which enables the administrator to compose the eLux applications to be saved on the flash memory of the Icebutler corresponding exactly to end-user requirements.

The ICEBUTLER is compatible with LDAP , Active Directory, Windows Nt Domain security and even smart card automatic login and roaming profiles.

Icebutler applications

Supported add-ons

ICA 6.3 client	
Thin print support,LPD and TCP/IP print server.	internal floppy,internal cd-rom
RDP native client	parallel,USB printer ,
Tarantella native client	Fujitsu-Siemens USB memory bird
Netscape , Opera ,Mozilla browser, kiosk mode Shockwave, Macromedia Flash	Fujitsu-Siemens USB traveler cd-rom
acrobat reader , Real player, Java	Fujitsu-Siemens USB floppy
SAP®GUI for Java	Wireless lan support for lucent orinoco
Terminal Emulation Suites :	Wireless lan for FSC I-gate
3270, 5250, 9750, 97801, VT320,	SUN Type 6
SCO ansi	Sun Microsystems (N860-8706-Txxx)
X11 terminal with XDM support	Sun Microsystems MOUSE Crossbow
VNC -Viewer	ISDN FRITZ card
Desktop tools	ADSL pppoe
	VPN Freeswan , F-Secure, citrix
	Fujitsu-Siemens smartcardreader

Data Sheet Icebutler 1

type : Based on Compaq EN 6350 SFF  
 Processor : Pentium II 350 Mhz  
 Bus Type : PCI,AGP,USB,IDE  
 Internal cache = 16+16 kb External cache : 512 kb  
 memory : 128 MB S dram  
 128mb compac Flash memory with elux software  
 sound card : Sound blaster compatible  
 Video ATI Mach 64 : 4mb (15 pins, VGA)  
 Lan : Intel pro 100 10/100 mb/s (RJ-45)  
 com ports : Com 1 , Com 2 (9 pin , 16 byte FIFO)  
 Printer Port : LPT 1 (25 pin, with EPP and ECP)  
 keyboard : USB / PS2  
 Mouse : Logitech optical Scroll mouse PS2  
 Electrical values : 100-127/200-240 Volt 50-60 Hz  
 Dimensions : 315 W x 370 D x 90 H in mm
